CHART I

**Controlled COF Versus Conventional NEX Films  
65% LDPE + 35% mLL Laminated to PET**

**Heat Aging Conditions: 110 degrees F for  
10 days**

TABLE 1

|                     | COF Values with 65% LDPE + 35% mLL laminated to PET                      |                   |
|---------------------|--|-------------------|
|                     | 300 ppm erucamide / 300 ppm oleyl palmitamide / 300 ppm steryl erucamide | 500 ppm erucamide |
| Unlaminated         | 0.2  | 0.2               |
| Laminated           | 0.22   | 0.28              |
| Laminated Heat Aged | 0.26   | 0.35              |
